Kaua‘i Department of Health announces three new cases of COVID-19

LĪHU‘E – The Kaua‘i District Health Office reported three new cases of COVID-19 on Saturday, Dec. 12.

One of the cases is an adult resident, and the two others are children: all are community-acquired infections. Today’s cases are from different households and not connected to each other. All active cases are in isolation, and one case is hospitalized on O‘ahu. Close contacts are being identified, directed to quarantine, and offered testing.

Today’s cases bring the number of on-island active cases to 17, with 155 cumulative cases. Kaua‘i’s cumulative case count includes 136 confirmed locally, one probable, and 18 positive cases diagnosed elsewhere, as they received their pre-travel test results after arriving on island.

The Department of Health advises residents to wear your mask at all times when outside your home and around other people. The virus is circulating in our community and is not confined to one location or part of the island. If we are all careful whenever we are out, we can continue to enjoy our Tier 4 activities through the holidays.

Mayor’s Emergency Rule 23 is in effect, which sets a temporary moratorium of the Safe Travels program. Under this rule, effective Dec. 2, all incoming travelers, including mainland, inter-island residents, and visitors, are under a 14-day mandatory quarantine.
The county’s modified quarantine program remains in place for critical infrastructure workers, essential medical travel, or other special circumstances. To apply for a modified quarantine, please visit www.kauai.gov/COVID-19 and click on the “modified quarantine request” button at the top of the page.
