Vaccine available now for health care workers

LĪHU‘E – The Kaua‘i District Health Office opened a COVID-19 vaccine clinic on Tuesday, Dec. 22, for health care workers who work outside of the major hospitals, working closely with private doctors offices, allied health professionals, and other health care facilities.

Health care workers whose offices have not yet registered their staff to be eligible for the vaccine are asked to call (808) 346-9605 to book an appointment. This opportunity is not limited to doctors. Providers and staff from practices such as dentists, physical therapists, mental health professionals, and other non-physician practices are welcome to register for vaccination.

As additional shipments arrive on Kaua‘i, vaccines will next be made available to first responders, then other priority groups.

For more information about COVID-19 on Kaua‘i, please visit https://www.kauai.gov/COVID-19.
