Comment:

Building a sidewalk by shortening the parking spaces on the park side of Kalena Street would create a traffic nightmare for the fire department trucks, ^{police/EMT vehicles,} and all the delivery trucks & busses traveling that short block between Rice & Hoala Streets.

Kalena is a very busy street from 7:30 - 5:30. We hear school busses picking up students on the corner of Malama & Kalena. Then there are large trucks making deliveries to the few businesses in this congested area. Throughout the day we have customers vying for parking spots and emergency vehicles traveling from Rice / Kalena and down Hoala Street frequently.

A police officer was in my store & I mentioned to him the planned sidewalk across the street. His comment: Narrowing the street will cause more congestion & hazards to this busy street. We both agreed the money could be spent more efficiently elsewhere.
