Attached is a Floor Amendment that was introduced and approved (except items 11-12 and 24-30; items 13 and 17 were approved as amended as shown on the following page) at the December 14, 2017 Special Planning Committee Meeting.

Item 13 was approved as amended as follows:

13. Amend Bill No. 2666 by amending the booklet entitled “Planning Commission Draft” dated “June, 2017,” including all Appendices, by amending 3.0 Actions By Sector, Sector: VIII. Energy Sustainability, Section 2.3 (Addressing Air Travel and Transportation) (page 183) as follows:

“While we have progressed with renewable energy production for electricity, we must address and find way to reduce or offset the fuel consumption of the transportation sector. Due to the rapid adoption of renewable energy by KIUC, 2015 marked the first year on Kaua‘i where greenhouse gas emissions from ground transportation were higher than from electricity production. In order to support the General Plan’s greenhouse gas reduction policy, Kaua‘i must reduce ground transportation emissions by 100% by 2045, with county vehicles reaching that goal by 2035. Using 2045 as a goal aligns the transportation sector with the electricity sector, which is currently mandated by [H.B. 623] **HRS Section 269-92** to reach 100% renewable energy by 2045. Technological breakthroughs in electric vehicles and alternative fuels support emissions reductions, but until those technologies take hold and become affordable, reductions to fossil fuel consumption for transportation will largely depend on individuals changing personal travel patterns and behaviors.”

Item 17 was approved as amended as follows:

17. Amend Bill No. 2666 by amending the booklet entitled “Planning Commission Draft” dated “June, 2017,” including all Appendices (e.g., Appendix G – Action Matrix), by amending page 176, item A.7. as follows:

“Encourage restoration, management, and practitioner access for significant cultural sites on private land, **as allowed by law**.”

to development, dams, and water diversions greatly impact watershed function and water quality.

Kaua'i's drainage system is mostly natural—comprised of its streams and rivers. This system is complemented by structures such as irrigation ditch systems and flood protection levees along certain streams. Kaua'i does not have an islandwide drainage master plan, but has in place drainage standards that require new development to maintain storm runoff to pre-development rates. Drainage master plans for new development must conform the requirements of the Kaua'i County Storm Water Runoff System Manual.

The Department of Public Works intends to focus on specific problem areas by developing strategic plans for flood-prone areas such as Hanalei, Nāwiliwili, Kapa'a, Wailua, Po'ipū, and Kekaha. These plans would provide detailed analyses of the flood conditions and specify preventative and remedial actions.

The annual report should not be considered a “wish list” for departments but reflect realistic constraints given budgetary availability.”</p>	
<p>11. Amend Bill No. 2666 by amending the booklet entitled “Planning Commission Draft” dated “June, 2017,” including all Appendices, by amending page 220 by amending the title of section 4.2.2., amending section 4.2.3., and adding a new section 4.2.4. as follows:</p> <p>4.2.2 COMMUNITY EDUCATION & CAPACITY BUILDING TRACKING AND REPORTING ACTION IMPLEMENTATION</p> <p>...</p> <p>4.2.3 UPDATING THE GENERAL PLAN The Kaua‘i County Code requires the County Planning Department to conduct a comprehensive review and update of the General Plan Update every ten years. In practice, that does not always happen, and even if it did, ten years is a long time when information and conditions are constantly changing. This plan aspires to be adaptable and responsive by building in a bi-annual review and reporting process that allows the County to take stock and keep a record of its progress, evaluate what’s working and what’s not, and consider how to change course or incorporate the best available information. The policies, actions, and Land Use Map may be updated in response to unexpected trends or new information. In this way, the General Plan can be a “living document.”]</p> <p>4.2.3 COMMUNITY EDUCATION AND CAPACITY BUILDING</p> <p><u>The State and County planning system is complex. From the State Land Use Districts to community plans, it can be difficult to navigate the various interrelationships between</u></p>	<p>Support</p>

land use laws, plans, and programs that comprise our planning system. Education, especially focused on youth, has the potential to increase the quality of input and the level of discussion on complex issues—especially where tradeoffs are involved. During the General Plan process, many community members expressed a desire to become more educated about land use planning. The Planning Department should continue working with schools to develop community planning curricula and should offer “Planning 101” seminars to coincide with the General Plan monitoring cycle.

4.2.4 UTILIZING AN ADAPTIVE MANAGEMENT PROCESS AND FEEDBACK LOOP TO CREATE “A LIVING PLAN”

The Kaua‘i County Code requires the Planning Department to conduct a comprehensive review and update of the General Plan Update every ten years. This benchmark is difficult to meet on a consistent basis and spans a time frame ill-suited to handle the rapid development of updated projections, new data sources, and changing conditions. Additionally, the impact of emerging technology, such as autonomous vehicles, is never fully understood in the present but has the potential to rapidly transform communities. In this modern age, Kaua‘i needs a more dynamic planning system. Adaptive Management is a process to counter uncertainty through: (1) monitoring, (2) iterative decision making, and (3) facilitation of course corrections. This process is implemented through the General Plan’s Implementation and Feedback Loop (Figure 4-1).

The General Plan aspires to be adaptive and responsive through an implementation program based on regular feedback through a transparent process. The Kākou Committee’s biennial review will allow the County to take stock and keep a record of its progress, evaluate what’s working and what’s not, and incorporate the best available information. This will provide the basis for more frequent, timely, and proactive adjustments to the policies and implementation actions as needed. As a result, the General Plan can remain current and dynamic—“A Living Plan.”

<p>12. Amend Bill No. 2666 by amending the booklet entitled “Planning Commission Draft” dated “June, 2017,” including all Appendices, by amending page 220 by adding a new section “4.2.5 IMPLEMENTATION ACTIONS” as follows:</p> <p>4.2.5 IMPLEMENTATION ACTIONS</p> <p>A.
