

SAFE ROOM EXEMPTION CRITERIA

In addition to FEMA Guidelines, Architect Stamped Plans, Plot Plan and Building Permit, an owner must have a Residence on the property and the Safe Room must adhere to the following criteria, before a "Safe Room Exemption" can be filed.

1. Must be a permitted building
2. Must have Independent Foundation
3. Must have Independent 4" Slab Ceiling
4. Must have Ventilation (by solar fan or PVC pipes)
5. Must have Heavy Steel Gauge Door that swings in

The Building certified Architect must stamp the Exemption Form; the County Engineering department must certify that the safe room is NOT located in flood zone, storm surge or other area susceptible to flooding; and the Zone Appraiser must inspect and verify before the exemption can be granted.

Form to be completed, stamped and signed-off for submission to RPA department by **September 30th** of any year, to benefit from a \$40,000 exemption the following year, into perpetuity.
