Construction to begin for Salt Pond Beach Park effluent system Jan. 7; one lane road closure scheduled along portions of Lokokai and Lele roads

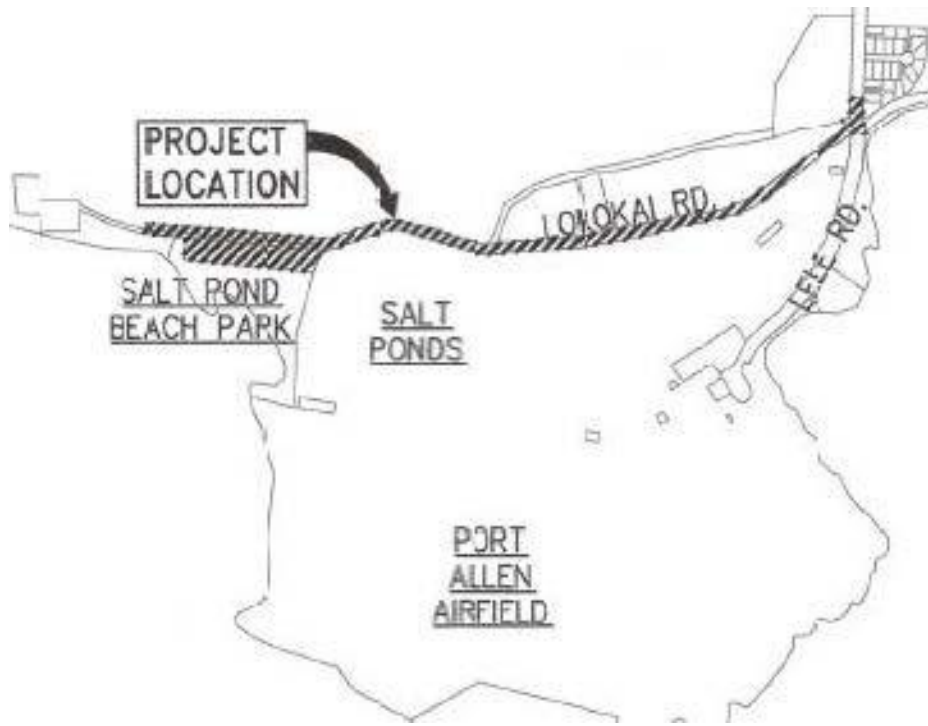

HANAPĒPĒ – County officials are announcing that construction for the Salt Pond Beach Park effluent system project will begin on Jan. 7 and is scheduled to be completed by August 2019, weather pending.

Contracted by Earthworks Pacific Inc., the \$1.19 million project will transfer effluent from current leachate fields in the park to be treated at the County's sewer wastewater treatment facility in 'Ele'ele.

Sewer work construction will require one lane road closures along portions of Lokokai and Lele Roads, Monday to Friday, from 7:30 a.m. to 3:30 p.m. Construction work will not affect the majority of parking at the park.

Motorists are advised to use extreme caution through the area, observe all traffic controls and posted signs, and stay alert for construction personnel and equipment. Please allow extra time when traveling through this area. Anyone with questions may call Earthworks Pacific Inc. at 246-8808 or Donald Fujimoto with the County of Kaua'i at 241-4882.
