- I. Pursuant to 103D-306, HRS, and Subchapter 9, Chapter 3-122, HAR, the Department requests sole source approval to purchase the following: **(Description of goods, services, or construction)**

Replace Flame Digester at Lihue WWTP.

Promark Corporation
PO Box 700244
Kapolei, HI 96709

- III. Estimated Cost: \$7429.32

- IV. Term of Contract or delivery time:

Net 30 days

- V. The goods, services, or construction has the following unique features, characteristics, or capabilities:

The flame torch on an anaerobic digester is primarily a safety device and enviromental control system. It protects the digester from overpressure, safely disposes of excess biogas, and minimizes greenhouse gas emissions by converting methane into carbon dixide and water.

- VI. Describe how the unique features, characteristics, or capabilities are essential for the agency to accomplish its work:

Anaerobic digesters produce biogas, which typically contains methane, carbon dioxide & small amounts of hydrogen sulfide. Methane is highly flammable. If gas production exceeds storage or usage capacity, pressure can uncontrolled releases.

We are replacing the digester with the same product to ensure no additional modifications. If a new brand is installed, it will require repiping and would be more expensive and require additional work.

VII. The following other possible sources for the goods, services, or construction were investigated but do not meet our needs because:

There are no other vendors that sells Varec-Biogas equipment products in the State of Hawaii.

VIII. Person(s) recommended to negotiate the sole source contract:
