

5.0 POLICY MAPS

The spatial policy of the General Plan is depicted in a series of maps that show the general locations of constraints, resources, and areas appropriate for growth.

5.1 OVERVIEW

The General Plan policy maps are spatial representations of existing and envisioned land uses, resources, and facilities across the island. The maps show the locations of existing resources, constraints, and development. They also identify areas that may be appropriate for future development. The maps were developed to be consistent with General Plan policies. They are intended to be utilized and cross-referenced against one another when considering future land use proposals or policies.

The 2000 General Plan contained two sets of policy maps (Land Use and Heritage Resources). This General Plan includes six sets of policy maps:

- Future Land Use (Section 5.2)
- Heritage Resources (Section 5.3)
- Hazards (Section 5.4)
- Infrastructure (Section 5.5)
- Public Facilities (Section 5.6)
- Transportation (Section 5.7)

Each set of policy maps includes a set of seven maps: An island-wide map and a large scale map for each of the six planning districts. Transportation is an exception with two maps: one showing transit and another showing roadways and paths. The role and function of each map is described at the beginning of the sections.
