Comments:

There are many groups on Kauai engaged in cooperative "hub" ventures. There also are networking people who promote them. The problem is joining them as they have unique priorities. I believe a governing body needs to set priorities & manage the center as if it were a business (with a zero-based budget). A person with a knowledge of the arts, but a business + marketing background is needed. ~ Oh, yes; they must have extreme diplomacy & patience.

The Form-Based Codes Institute defines Form-Based Codes as follows:

Form-based codes foster predictable built results and a high-quality public realm by using physical form (rather than separation of uses) as the organizing principle for the code. These codes are adopted into city or county law as regulations, not mere guidelines. Form-based codes are an alternative to conventional zoning.

The most important aspect of this definition in terms of differentiating FBCs from Euclidean zoning is that the intended physical form or desired place requires use as the organizing principle, or "form over function." In other words, if a zone is labeled "single-family residential," it might be called "traditional neighborhood," and instead of a zone being called "commercial," it might be called "neighborhood main street." The terms "neighborhood" and "main street" tie back into the intended physical form or place, both of which may include a mix of uses and different building types that create a vibrant walkable urbanism. The urban-to-rural Transect, which categorizes a spectrum of urban to rural contexts in six Transect zones (from the most urban T6 to the most rural T1), is a prominent organizing principle within Form-Based Code practice. The second important aspect of this definition is that FBCs replace zoning and are not merely design guidelines.

The Organizing Principle: The Rural-to-Urban Transect

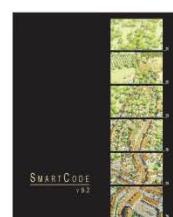

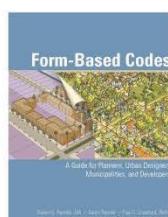

Why are Form-Based Codes Needed?

The current zoning system is broken; it has produced auto-dependent development patterns that have compromised community character, our nation's health and the environment and have left communities searching for tools to address these issues.

Form-Based Codes are an alternative to Euclidian Zoning that focus on the creation, revitalization, and preservation of vibrant, walkable urban places. As Elizabeth Plater-Zyberk states in Form-Based Codes, "as Global Society swings into action to reduce dependence on oil, the data clearly speak to the need to reduce dependence on vehicular mobility and to remake the built environment as transit- and pedestrian-friendly places of dense economic and social interaction. Only the Form-Based Code can ensure such an urbanism." Even developers are supporting this push for zoning reform; at the 2009 New Partners for Smart Growth Conference in Albuquerque, developer Rob Dixon presented "Top 20 Ways to Make a Green Smart City" and "replace your Euclidean zoning with Form-Based Codes" was number two on his list.

As the market demand for walkable urbanism grows and demographics shift, Form-Based Codes, when created according to these best-practice standards, have proven to be an effective tool for breaking down barriers to developing and revitalizing urban places and ensuring high-quality predictable built results.

For a more detailed description of Form-Based Codes see "Form-Based Codes," by Parolek or go to the Form-Based Code Institute's web site at www.formbasedcodes.org. The SmartCode is a model, Transect-Based, Form-Based Code.

Lihue Kaona

1. What placetype best describes Lihue? (circle one)

Camp	Cluster	Neighborhood	Small Town	Village
City	Crossroad	Large Town	Town Center	Other? _____

2. Would you want to see change in Lihue? (If yes, what type of change? If no, why not?)

vibrant town core + gov't center

3. How can Lihue become more walkable?

*sidewalks, less traffic-use bypass
more roundabouts to slow traffic*

4. How would you improve connections? Any suggestions on where to start?

path across Hawaiianali at Alakea, Waa + Halepa

Puhi

1. What placetype best describes Puhi? (circle one)

Camp	Cluster	Neighborhood	Small Town	Village
City	Crossroad	Large Town	Town Center	Other? <i>New Hub</i>

2. Would you want to see change in Puhi? (If yes, what type of change? If no, why not?)

*Puhi is already equipped w/ educational ~~buildings~~, performing arts, Community Garden
(Also has the Park by Grove Farm office so can be changed or just need to
improve on as Puhi is the new hub on Kauai. It will be the next destination
on Kauai so we need to consider creating safer walk paths. The new KPCC or Hōau Philippa
Cultural Center will also be located in Puhi!)*

3. How can Puhi become more walkable?

- Also consider adding bike lanes, shorter walk paths
- From KCC to the historic Mililani has a back road but it's too long to walk, perhaps create a path closer to link the two
- Sidewalk along Puhi Store to Komohana Subdivision to have easy access to the restaurants

4. How would you improve connections? Any suggestions on where to start?

*Puhi's central area could be the College. There's farmer's market, Island School, charter school
in the area.*

Hanamā'ulu & Kapaia

1. What placetype best describes Hanamaulu? (circle one)

Camp	Cluster	Neighborhood	Small Town	Village
City	Crossroad	Large Town	Town Center	Other? _____

2. What placetype best describes Kapaia? Cross road

3. Would you want to see change in Hanamaulu? (If yes, what type of change? If no, why not?)

Food & bone
town center retail
better park, beach being more part of town
more paths
Add community center + senior center

4. How can Hanamaulu be more walkable?

look for potential mid-block paths to encourage walking
move Hwy 10 bypass behind mauka housing

5. How would you improve connections? Any suggestions on where to start?

put in sidewalks both side Kuhio
develop church lands + mall site

Nāwiliwili

1. What placetype best describes Nawiliwili? (circle one)

Camp	Cluster	Neighborhood	Small Town	Village	+ visitor destination
City	Crossroad	Large Town	Town Center	Other? harbor	

2. Would you want to see change in Nawiliwili? (If yes, what type of change? If no, why not?)

heightened walkability, destination-to-destination connectivity
enhanced access to landscape, expanded public space opportunity,
celebration of its historic properties

3. How can Nawiliwili become more walkable?

Build dedicated pedestrian bridge adjacent to Nawiliwili bridge.
Widen + landscape sidewalks — enlarge/develop connectivity
between walking areas

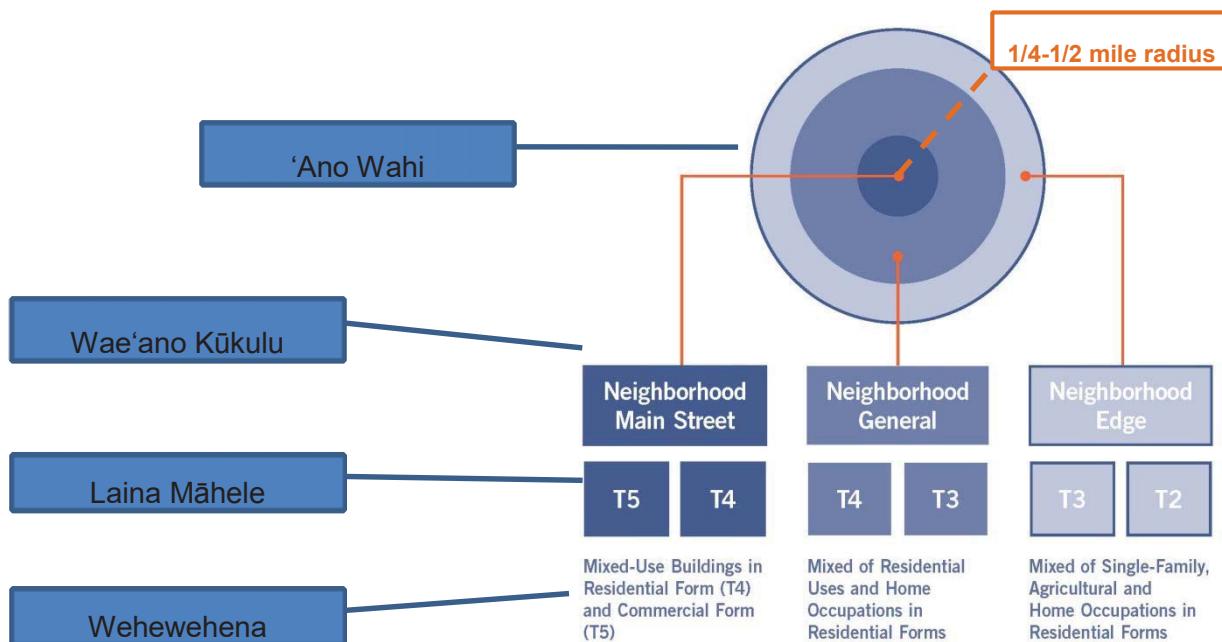

4. How would you improve connections? Any suggestions on where to start?

convince govt entities to make beautification/people
orientation a priority to develop
